Author and title index

Abrahamson K, Adler A, Higham L, Kirkpatrick D: Randomized function evaluation on a ring 107
Adler A → Abrahamson K

Back RJR, Kurki-Suonio R: Decentralization of process nets with centralized control 73
Bar-Noy A, Ben-Or M, Dolev D: Choice coordination with limited failure 61
Ben-Or M → Bar-Noy A

Chan MY, Chin FYL: Distributed election in complete networks 19
Chin FYL → Chan MY
Comer DE, Peterson LL: Understanding naming in distributed systems 51
Cristian F: Probabilistic clock synchronization 146

Dolev D → Bar-Noy A

Fagin R → Halpern JY

Glasgow JI, MacEwen GH: An operator net model for distributed systems 196

Halpern JY, Fagin R: Modelling knowledge and action in distributed systems 159
Higham L → Abrahamson K
Hilbers PAJ, Lukkien JJ: Deadlock-free message routing in multicomputer networks 178

Jalote P: Fault tolerant processes 187
Josephs MB: A state-based approach to communicating processes 9

Kirkpatrick D → Abrahamson K
Kurki-Suonio R → Back RJR

Lin H-A: A methodology for constructing communication protocols with multiple concurrent functions 23
Lukkien JJ → Hilbers PAJ

MacEwen GH → Glasgow JI
Maxemchuk NF, Sabnani K: Probabilistic verification of communication protocols 118
Meyer J-JC, Vink EP de: Step semantics for "true" concurrency with recursion 130

Peterson LL → Comer DE
Pixley C: An incremental garbage collection algorithm for multi-mutator systems 41

Rajopadhye SV: Synthesizing systolic arrays with control signals from recurrence equations 88

Sabnani K → Maxemchuk NF

Verhoeff T: Delay-insensitive codes – an overview 1
Vink EP de → Meyer J-JC
